Portfolio: <https://tavishac.github.io/portfolio/>

PROFESSIONAL SUMMARY

Computer Science undergraduate at KMIT with a strong interest in software development, machine learning, and data analysis. Experienced in building web and AI-based applications using Python, JavaScript, and modern frameworks. Passionate about solving real-world problems through technology.

SKILLS

Languages C, C++, Java, Python

Web Technologies HTML, CSS, JavaScript, React.js, REST APIs

Databases MySQL, MongoDB

Cloud & Tools AWS, Git, VS Code, Figma

UI/UX Prototyping, User Flows, Usability Testing

Core Concepts Data Structures & Algorithms, OOP, Operating Systems

Soft Skills Teamwork, strong work ethic, task ownership and accountability, punctuality

PROJECTS

Datagraph AI – Intelligent Data Analysis Web Application github.com/tavishac/Dataverse-AI

Web application that lets users upload datasets and generate real-time insights and visualizations.

- Implemented automated data analysis pipelines using Python and Pandas to generate statistical summaries
- Built a FastAPI backend for file uploads, dataset processing, and returning results via REST APIs

Technologies: Python, FastAPI, React, Pandas, Plotly, JavaScript

Emotion Detection in Online Assignments github.com/tavishac/Emotion-Detection-in-Online-Assignments

System that detects student emotions during online assessments using computer vision and facial expression analysis.

- Implemented real-time facial emotion detection using machine learning models
- Designed the system to monitor engagement and identify stress patterns during online assessments

Technologies: Python, MongoDB, Machine Learning, HTML, CSS, JavaScript

Fake News Detection System github.com/tavishac/FakeNews-Detection

Machine learning web application that classifies news articles as fake or real using NLP techniques.

- Built and trained classification models using labeled datasets
- Implemented NLP-based feature extraction to convert textual data into machine learning inputs

Technologies: Python, NLP, Scikit-learn, Pandas, HTML

Real-Time Threat Detection System github.com/tavishac/threat-detection

Web application that monitors and detects potential security threats through behavioral analysis.

- Implemented logic for analyzing suspicious activity in real time
- Designed dynamic threat detection algorithms for monitoring user interactions

Technologies: Python, JavaScript, HTML, MySQL

EXPERIENCE

Internship at Geonixa - Role: ML intern 05 july 2026-26 sep 2026

EDUCATION

Keshav Memorial Institute of Technology (KMIT) – Computer Science undergraduate

LEADERSHIP & VOLUNTEERING

National Service Scheme (NSS) – KMIT | Coordinator & Volunteer In-Charge (2025-26)

- Organized blood donation drives and social awareness campaigns
- Led community outreach programs including voter awareness and educational initiatives
- Coordinated volunteers and managed event planning activities

LANGUAGES & INTERESTS

Languages: Telugu, Hindi, English

Interests: Artificial Intelligence, Machine Learning, Cloud Computing, Cyber Security, Redis, PHP, React, computer networks; solving algorithmic problems on LeetCode and HackerRank
